

## ULTRASONIC CLEANING MACHINE

**Quickly removes oil stains** from the surface of objects.

# Ultrasonic Cleaning Machine

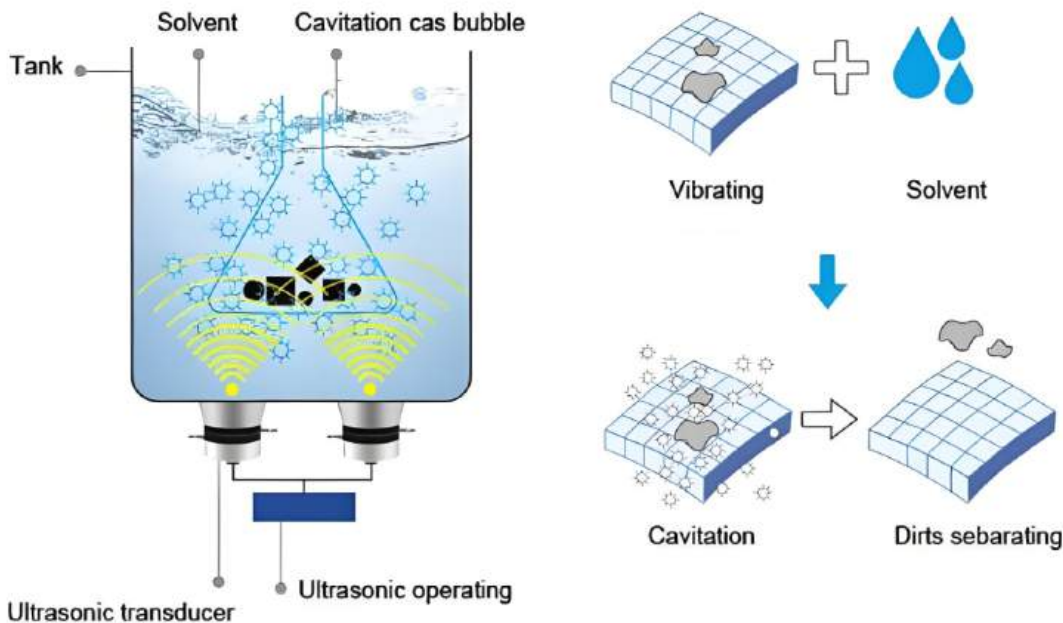

**Ultrasonic Cleaning Machine** is a device that uses ultrasonic cavitation to clean objects.

It consists of an ultrasonic control box, a transducer, and a cleaning tank.

When working, countless tiny bubbles are formed in the cleaning liquid.

The impact force generated by the bursting of bubbles can effectively remove dirt, grease, etc. on the surface of objects. It has the advantages of good cleaning effect, high efficiency, and little damage to objects. It is widely used in auto repair, electronics, machinery, medical treatment, jewelry and other fields.

**Discover all its features.**

# Small Space Big Achievements

## Advantages:

- Compact structure
- Easy to operate
- Good cleaning effect

## Optional functions:

- Top cover
- Cleaning basket
- Heating
- Frequency conversion
- Bubble function
- Circulation filtration
- Multiple tanks

Details that make the difference

# Applicable Stain Types

Used to remove oil, grease, dirt, dust, debris, mud, corrosion, cleaning between processes or production slag on the surface of parts; cleaning before assembly of parts.

## Application

Car Repair

Mechanical industry

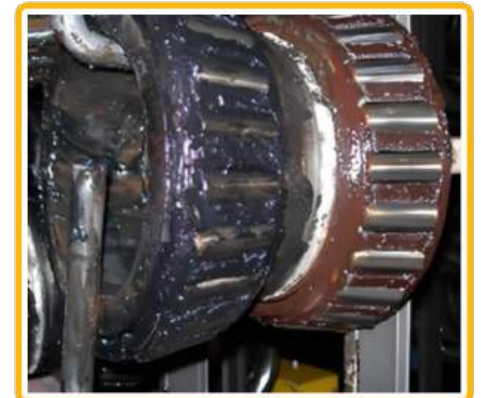

Electronics Industry

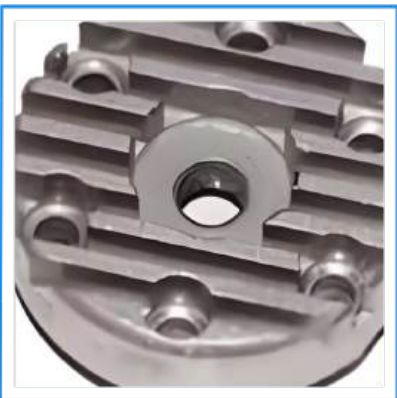

Chemical Industry

# Cleaning Effect Comparison

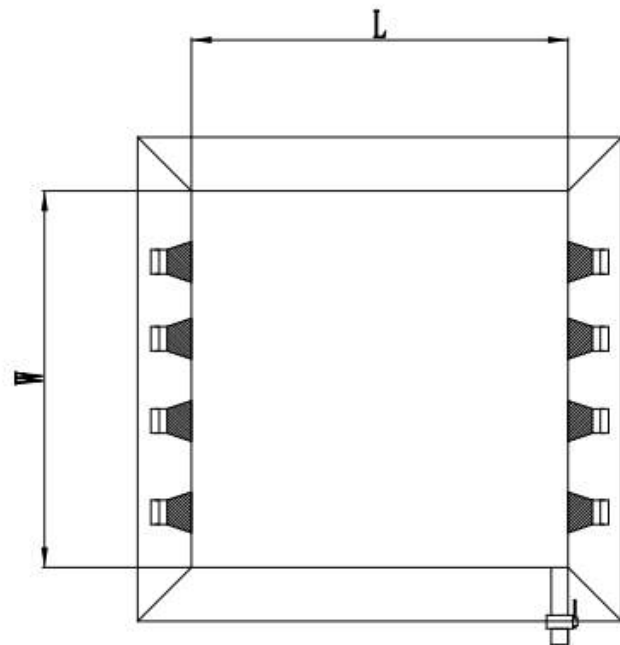

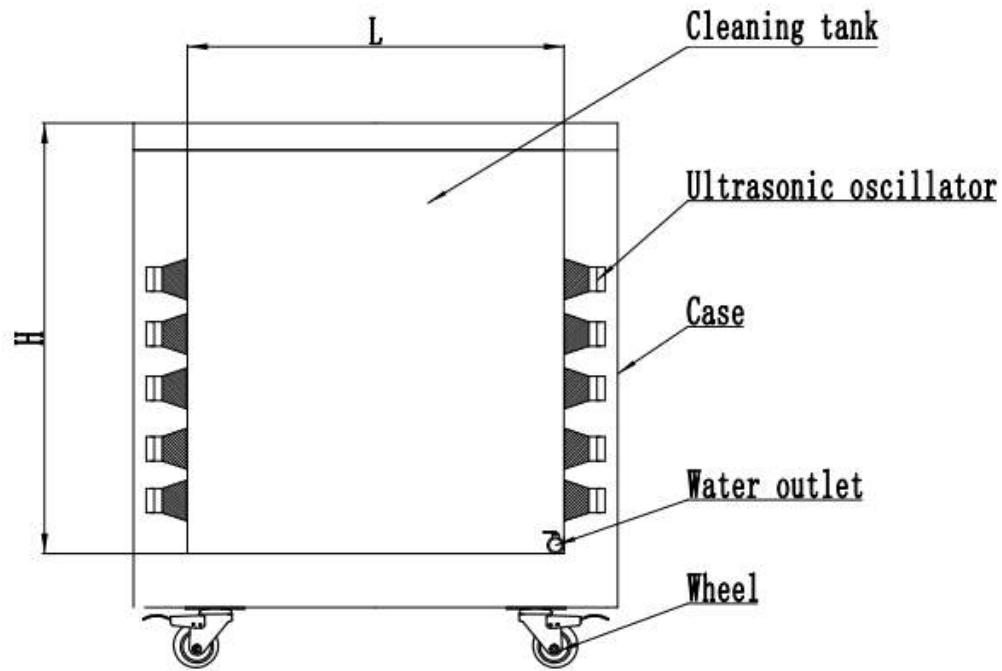

Optimum Production. Perfect Results.

# Product Display

# Selection Guide

Provide the size of the cleaning tank to us.  
(**Length**, **Width** and **Height**)

**OR**

1. Type of **stains** to be cleaned
2. Size of the object to be cleaned (Length, Width and Height)
3. Quantity of objects to be cleaned each time

We design the tank size for you based on this information

**MORE THAN A TECHNICAL SERVICE.  
WE ARE YOUR TEAM!**
